

COMM144 Generative AI

5th Workshop

Guoqiang Zhang

Exercise 1

Practice with python programming for computing FID and IS scores with a pretrained GAN model.

1. Download and uncompress the python files from ELE website.
2. Download the pretrained model "network-snapshot-final.pkl" from the website [link](#)
3. Put the pretrained model to the folder COMMM114_workshop5
4. Upload the entire folder to your google drive
5. open w5.ipyny to start working on the python programming.
